EUROPEAN PROTEOMICS ASSOCIATION

French Proteomics Society

Dear all,

We are delighted to welcome the EuPA 2025 conference to Saint-Malo, and to bring together a large part of the proteomics and mass spectrometry community around an exceptional scientific program covering the most recent aspects of these disciplines.

Saint-Malo, historic home of great discoverers and privateers, is an exceptional fortified city on the north coast of Brittany. Visitors can enjoy breathtaking views over the Bay of Saint-Malo as they stroll along the 1.5 miles of ramparts that surround the walled city. Close to Saint-Malo is Mont Saint-Michel, on the edge of Normandy. This windswept rocky islet is arguably the most prestigious creation of the Middle Ages.

We hope that Saint-Malo's magnificent location and relaxing atmosphere will enable you to enjoy fruitful and informal exchanges with the proteomics community.

We wish you a pleasant stay in Saint-Malo.

Charles Pineau, Christine Carapito, Yves Vandenbrouck
CHAIRS OF EUPA 2025

SCIENTIFIC COMMITTEE EUPA 2025 :

Tiziana Bonaldi - *Italy*
Christine Carapito - *France*
Eva Csösz - *Hungary*
Felix Elortza - *Spain*
Maurine Fucito - *Italy*
Bruno Manadas - *Portugal*
Katrin Marcus - *Germany*
Delphine Pflieger - *FPS President - France*
Charles Pineau - *France*
Jochen Schwenk - *Sweden*
Matthias Trost - *UK*
Yves Vandenbrouck - *France*

French Proteomics Society

The French edition is supported by the French Proteomics Society (FPS, formerly SFEAP), a French scientific and technical association whose aim is to encourage, promote and carry out any action for the development of methods for the separation, characterization and quantification of peptides and proteins.

EUPA is supported by a Scientific Advisory Board of 11 members from the best-known scientists in their fields, drawn from all over France, but also from other border countries like Hungary, UK, Italy, Germany, Portugal, Sweden...

EUROPEAN PROTEOMICS ASSOCIATION

The European Proteomics Association (EuPA) was founded in 2005 and is a federation of 23 European national proteomics societies. It was created to coordinate and integrate national initiatives in the field of proteomics. Its main objectives are to strengthen and promote basic research and applications, as well as education and training in all areas of proteomics throughout Europe.
